constancia refined colour palette

A modern, premium system with a dark graphite base, warm light neutrals, and pink/green accents that complement each other.

#F6F3EE Main light

A warm off-white that keeps the palette feeling human and elevated rather than cold or clinical.

#252826 Secondary dark

Soft graphite charcoal, enough depth to make the rose, berry and mint tones feel premium, but it is not as harsh as pure black. It also has a very slight green/neutral undertone, which helps it sit naturally with your mineral green and deep mint.

#D8D0C6 Support neutral light

A muted stone neutral that helps with hierarchy, spacing, sectioning and softer contrast.

#C77A93 Muted rose

A refined pink accent that adds warmth, distinctiveness and personality without becoming too soft or trend-led.

#8E4F67 Deep berry

A grounding accent that gives the rose depth and helps the palette feel more premium and commercially credible.

#7FB8A3 Mineral green

A fresh mineral/mint green that adds clarity and contrast. It complements the rose well and gives the system a more modern, intelligent edge.

#5E8D7A Deep Mint

A darker, more grounded mint-green that gives the palette balance and control. It strengthens the green side of the system, adds richness, and works well for more premium or understated moments where the lighter mineral green would feel too bright.

constancia overall identity should stay dark-led and restrained

Main light for readability and contrast

Secondary dark for layering and structure and copy

Support neutral light for subtle supporting surfaces

Muted rose for warmth and emphasis

Deep berry for stronger brand moments and depth

Mineral green for freshness, contrast and digital/product cues

The rose and mineral green should be used as accent colours, not dominant fills.
